

ESP ACCESSORIES

Motor Adapters

DATASHEET

Product Description

The OXMOS line of motor adapters is used to connect an ESP gauge to the bottom flange of an electric submersible motor. The motor adapter contains and secures the motor shorting ring and also has a port for a drain and fill valve which is used to fill the motor with oil. A wide range of motor adapters are available to connect any brand of ESP gauge to any model and size of motor.

Applications

Completions with Electric Submersible Pumping Systems

Completions with Electric Submersible Pumping Systems using downhole ESP gauges

Material

Carbon Steel

13 Chrome Steel (SS 420)
